## CLAIMS

## What is claimed is:

- 1. A wet paper web transfer belt for use in the press part of a closed draw papermaking machine, said belt comprising a base body, a machine side layer, and a wet paper web side layer, the wet paper web side layer having a wet paper web contacting surface and having porous bodies embedded therein, wherein a plurality of said porous bodies are exposed at said wet paper web contacting surface.
- A wet paper web transfer belt as claimed in claim
  wherein porous bodies protrude from the wet paper web side layer.
- 3. A wet paper web transfer belt as claimed in claim 1, wherein the porous bodies are constituted by a porous filler.
- 4. A wet paper web transfer belt as claimed in claim 1, wherein the porous bodies are constituted by porous fibers.
- 5. A closed draw papermaking machine comprising a press part and a wet paper web transfer belt arranged to carry a wet paper web through said press part, said transfer belt comprising a base body, a machine side layer, and a wet paper web side layer, the wet paper web side layer having a wet paper web contacting surface and having porous bodies embedded therein, wherein a plurality of said porous bodies are exposed at said wet paper web contacting surface.
- A closed draw papermaking machine as claimed in claim
  wherein porous bodies protrude from the wet paper web side
  layer.

- 7. A closed draw papermaking machine as claimed in claim 5, wherein the porous bodies are constituted by a porous filler.
- 8. A closed draw papermaking machine as claimed in claim5, wherein the porous bodies are constituted by porous fibers.
